Statutory and Regulatory Background

9. Section 602(a) of the CAA, 42 U.S.C. § 7671a(a), requires the Administrator of EPA (the Administrator) to publish a list of class I substances, including certain chlorofluorocarbons and other chemicals, and to add to that list any other substance that the Administrator finds causes or contributes significantly to harmful effects on the stratospheric ozone layer.

10. Section 602(b) of the CAA, 42 U.S.C. § 7671a(b), requires the Administrator to publish a list of class II substances, including certain hydrochlorofluorocarbons and other chemicals, and to add to that list any other substance that the Administrator finds is known or may reasonably be anticipated to cause or contribute to harmful effects on the stratospheric ozone layer.

11. Section 608(a)(2) of the CAA, 42 U.S.C. § 7671g, provides, in part, that the Administrator shall promulgate regulations establishing standards and requirements regarding the use and disposal of class I and class II substances during service, repair, or disposal of appliances and industrial process refrigeration.

12. On May 14, 1993, pursuant to Section 608(a) of the CAA, 42 U.S.C. § 7671g(a), U.S. EPA published regulations for the protection of the stratospheric ozone establishing standards and requirements regarding the use and disposal of class I and class II substances

during service, repair, or disposal of appliances and industrial process refrigeration. These regulations, which have been subsequently amended, are codified in Title 40 of the Code of Federal Regulations, Part 82, Subpart F, Recycling and Emissions Reduction.

13. 40 C.F.R. § 82.156(f) requires, in part, that persons who take the final step in the disposal process (including but not limited to scrap recyclers and landfill operators) of a small appliance to either: 1) recover any remaining refrigerant from the appliance in accordance with 40 C.F.R. § 82.156(g) or (h); or 2) verify that the refrigerant has been evacuated from the appliance or shipment of appliances previously. Such verification must include a signed statement from the person from whom the appliance or shipment of appliances is obtained that all refrigerant that had not leaked previously has been recovered from the appliance or shipment of appliances.

14. 40 C.F.R. § 82.166(i) requires, in part, that, persons disposing of small appliances, motor vehicle air conditioners (MVACs), and MVAC-like appliances must maintain copies of signed statements obtained pursuant to 40 C.F.R. § 82.156.

15. Appliance is defined in Section 601(1) of the CAA, 42 U.S.C. § 7671(1), and 40 C.F.R. § 82.152(a) as any device which contains and uses a class I or class II substance as a refrigerant and which is used for household or commercial purposes, including any air conditioner, refrigerator, chiller, or freezer.

16. Small appliance is defined in 40 C.F.R. § 82.150(a) as any appliance that is fully manufactured, charged, and hermetically sealed in a factory with five (5) pounds or less of a class I or class II substance used as a refrigerant, including, but not limited to, refrigerators and freezers (designed for home, commercial, or consumer use), medical or industrial research refrigeration equipment, room air conditioners (including window air conditioners and packaged

terminal air heat pumps), dehumidifiers, under-the-counter ice makers, vending machines, and drinking water coolers.

17. MVAC is defined at 40 C.F.R. § 82.152 and 40 C.F.R. § 82.32(d) as mechanical vapor compression refrigeration equipment used to cool the driver's or passenger's compartment of any motor vehicle.

18. Disposal is defined in 40 C.F.R. § 82.152 as the process leading to and including: (1) the discharge, deposit, dumping or placing of any discarded appliance into or on any land or water; (2) the disassembly of any appliance for discharge, deposit, dumping or placing of its discarded component parts into or on any land or water; or (3) the disassembly of any appliance for reuse of its component parts.

19. The Administrator may assess a civil penalty of up to \$37,500 per day of violation up to a total of \$295,000 for violations of the regulations for the protection of the stratospheric ozone that occurred between January 12, 2009, and December 6, 2013, pursuant to Section 113(d)(1) of the CAA, 42 U.S.C. § 7413(d)(1), and 40 C.F.R. Part 19.

20. Section 113(d)(1) of the CAA limits the Administrator's authority to matters where the first alleged date of violation occurred no more than 12 months prior to initiation of the administrative action, except where the Administrator and Attorney General of the United States jointly determine that a matter involving a longer period of violation is appropriate for an administrative penalty action.

21. The Administrator and the Attorney General of the United States, each through their respective delegates, have determined jointly that an administrative penalty action is appropriate for the period of violations alleged in this complaint.

31. From August 2, 2010 to October 26, 2011, Respondent failed to verify, by, among other things, collection of a signed verification statement from the person from whom the appliances or MVACs were obtained, that the refrigerant had been evacuated from the appliances
